### PRODUCT: DIBUTYL PHTHALATE(DBP)

#### PROPERTIES:

Di -n-butyl phthalate (DBP) is transparent oil liquid with an aromatic smell and strong solubility. Nitro Cellulose, polystyrene etc. most organic Solvents and hydrocarbon type Dissolve well in Dion butyl phthalate (DBP). The Product is Fine and main plasticizer for cellulosic resin and polyvinyl Chloride, and Suitable especially for nilro cellulose Paint paint, which has fine Solubility, Depressiveness and adhesion. The membrane of paint has good Softness and Stability.

#### APPLICATION

It can be used in the production of colour thin film, leatherette and plastic because of its good Solubility with dye. It can also be used as a softening agent for Polyvinyl Chloride, alkylid resin, ethyl cellulose and dupreme rubber so as to raise rebound elasticity of the products.

#### SPECIFICATION

ITEM	STANDARD
Appearance	Transparent oily liquid
Ester, %≥	99.5

Density (20 *C ), g/cm <sup>3</sup>	1.044-1.048
Acidity ( as phthalate acid ) % ≤	0.010
Flash point ,*C ≥	160
Chroma ,(Pt-Co) #≤	25
Loss on heat,% ≤	0.03
Chroma after heat treatment ( Pt-Co) ≤	100

## PACKING

200 kg /New iron drum net weight ,16 mts in 20\* FCL by flexi bag
